

dovetail 

A new tool for dentists.

Electronic Dental Record

Developed for the mobile world, Dovetail's intuitive cloud-based Electronic Dental Record (EDR) solution provides you with an easy way of accessing and entering patient information, completing exams, developing treatment plans and producing progress notes whether you are in your clinic or on the go. Information is available where you need it, when you need it, all from your mobile tablet – or from any platform that has a web browser. It also allows you to collaborate on treatment plans and share information securely and seamlessly without ever having to manage fax or emails.

- Dashboard
- Medical history
- Exams
- Treatment plan
- Progress notes
- Digital radiography
- Collaboration/sharing tools
- Voice recognition

Practice Management

Dovetail's practice management features enable you to really take a hold of your practice. From customizing your practice settings, to adding staff members, to configuring treatments and adding templates, you have the control – and this, directly from your mobile tablet.

Dovetail's practice management solution also allows you to schedule appointments, submit electronic insurance claims, process debit and credit card payments and see what's happening in real-time both from a productivity and a financial standpoint.

Scheduling

Dovetail's scheduling solution offers your practice a flexible tool to automatically create appointments from a treatment plan, book these appointments, send automatic reminders to your patients and receive confirmation using emails or text messages. That means less time spent by your secretaries on scheduling tasks and fewer missed appointments.

Medical Billing

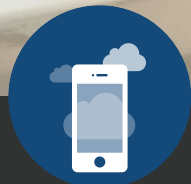

Dovetail's medical billing solution takes all the paper and most of the work out of insurance claims. By filing your dental claims electronically with Dovetail, you eliminate the data entry and follow-up steps required by paper claims. You'll find dental claims are submitted more efficiently and with fewer errors and omissions. That means faster turn around time and fewer returned or denied claims.

Mobile Payment

With Dovetail's mobile payment solution, you can process credit cards directly from your mobile device. Enjoy secure mobile payment processing for all major debit and credit cards while benefiting from a low transaction rate. That means no need for a dedicated payment system and more money in your pockets.

Analytics

Since all information regarding patients, treatments, referrals, collaborators, appointments, financial transactions, etc. reside on one platform, Dovetail allows you to run multiple reports in order to better understand what is going on in your practice.

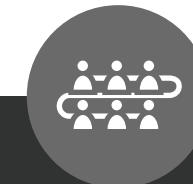

Cloud-based & mobile

The Dovetail cloud-based electronic dental record (EDR) solution is designed specifically for the mobile tablet but accessible through any platform. That means you and your staff have access to the most up-to-date information wherever and whenever you need it. No downloads, updates, backups or maintenance required – easy.

Collaboration & sharing

Dovetail is made for collaborating. Whether within your own clinic or with referring dentists, Dovetail makes it easy to share files and collaborate on treatment plans without ever having to manage emails and faxes – everyone's on the same platform, everyone's on the same page.

Increased efficiency

Dovetail's intuitive dental practice management platform enables your clinic to literally go paperless - from the moment patients enter their medical history to the moment you get paid. Everything is seamless. Scheduling, exams, treatment planning, progress notes, all is efficiently done using your tablet – your practice in hand.

About Us

Gaargle Solutions Inc., the company behind Dovetail, has set out to do one thing - provide health-care professionals with intuitive software solutions to streamline their practice while providing the best possible care to their patients. To achieve this, Gaargle has developed cloud based electronic dental record (EDR) and practice management solution specifically designed for mobile tablets.
